

To All Ag Reporter Email Recipients:

Here is a special edition of the Ag Reporter Snapshot.

We would like to invite you to attend the next **Beans & Bull Virtual Session:**

Waterhemp and White Mold the Scourge of Wisconsin

February 4 @ 7:00 pm - 8:00 pm

Registration link: <https://badgerbean.com/event/beans-bull-waterhemp-white-mold-scourge-wisconsin/>

Topics:

- **Outsmarting waterhemp in 2021: Rodrigo Werle:** Waterhemp management represents a major challenge for soybean farmers in Wisconsin and beyond. During this presentation we will discuss the status of waterhemp herbicide resistance in Wisconsin and integrated weed management considerations for 2021 and beyond.
- **White Mold and What We Have learned About Management in Recent Years:** Damon Smith: In recent years there has been much research done on the integrated management of white mold. We will discuss the findings of these sponsored research including recommendations of row-spacing, seed rates, fungicide recommendations and how to tie these into a coherent plan.

About: the **Beans & Bull** event is a new series of online meetings to connect Wisconsin farmers with new research and techniques to improve their crop management practices. This event is being organized by the Wisconsin Soybean Association (WSA), the Wisconsin Soybean Marketing Board (WSMB), and the UW-Madison Extension Program. Thanks to Dr. Shawn Conley (UW Extension Soybean and Small Grains Specialist) for leading the effort!

Please feel free to forward this email to those who may find the information herein useful.
