

To All Ag Reporter Email Recipients:

Another Special Edition of the Columbia County Ag Reporter Snapshot for a program this week!

## **Join us for Another Beans and Bull Session**

### **Agronomy 101: Planting Date, Seeding Rate and Replant Recs Oh My!**

**Thursday, February 11, 2021 7:00 pm to 8:00 pm**

About this Event

Shawn Conley: Sometimes we need to be reminded of the simple agronomic basics that provide the highest ROI. Here we will discuss strategies to tweak the basics and put more beans in the bin and dollars in your pocket!

The OTHER Soybean Diseases in Wisconsin and How to Manage Them:

Damon Smith: While white mold is a significant soybean disease to manage in Wisconsin, there are other diseases such as sudden death syndrome and emerging diseases like frogeye leaf spot. We will discuss these other significant diseases and how to manage them.
